

# Q4: Brain Metastases

I believe WBRT should be considered for the majority of patients with brain metastases

1. Yes
2. No
3. Not sure / don't know

# Q5: Brain Metastases

Stereotactic radiosurgery (SRS) is to be preferred over WBRT for good prognosis brain metastases

1. Yes
2. No
3. Only if equal or less than 3 brain mets

# Q6: Surgery/SRS ± WBRT

Surgery or radiosurgery followed by WBRT improves survival in patients with brain metastases

1. Yes
2. No
3. Cannot be answered globally, depends on tumor type and histology

# Q7: SRS

Stereotactic radiosurgery should only be considered in patients with controlled systemic disease

1. Yes
2. No
3. Not sure / don't know

# Q8: Antiepileptics

Patients with brain metastases should receive prophylactic antiepileptics before developing seizures

1. Yes
2. No
3. Not sure / don't know
